

The Heart of Our Business

Legacy Portrait Studio

All of my life I have been surrounded by strong powerful women. Over the years I have noticed that those same women were always the ones who put themselves last every time. After work, the kids, the house, the bills. The heart of our business is to help those women see how beautiful and valuable they are, even if they can't see it in themselves right now.

We provide a Hollywood cover shoot experience for everyday women. A full celebrity experience designed to make the women you love the most in your life feel valued and pampered, their every need taken care of before they even need to ask. Once they look and feel amazing we then take the most beautiful portraits they have ever seen of themselves. The portraits that will be found in the attic by your grandchildren. They will say

"This is my Grandma, isn't she beautiful".

Every woman deserves to feel like the most beautiful woman in the room. Every woman who puts herself last, every woman who needs reminding of how beautiful she is. That is what we do.
